SKU: CAP-24

Category: Passive Components

Tag: Ceramic Capacitor

## DESCRIPTION

### DESCRIPTION

These are high quality TDK 10uF, 16V radial leaded multilayer ceramic capacitors.

### PACKAGE INCLUDES:

- Qty 5 - 10F , 16V Multilayer Ceramic Capacitors

### KEY FEATURES OF 10UF, 16V MULTILAYER CERAMIC CAPACITORS:

Multilayer Ceramic Capacitors (often shortened to MLCC) are the go-to general purpose capacitors that can be used in most applications that require smaller capacitance values of  $\leq 10\mu\text{F}$ .

These large capacitance 10uF MLCC caps can be used in place of 10uF electrolytic capacitors to reduce board space or for increased lifespan compared to electrolytic caps.

These capacitors are frequently used for bypassing and decoupling applications and will work in most applications that call for a 10uF capacitor.

Notes: None

## TECHNICAL SPECIFICATIONS

Capacitance		10uF
Voltage	Maximum Rating	16VDC
Tolerance		± 10%
Type		Multilayer Ceramic
Dielectric		X7R
Polarization		None
Package		Conformally coated
Dimensions	Body length	5.5mm
	Lead Length	5mm
	Lead Spacing	2.5mm (0.1")
Mfr		TDK
Datasheet		<b>FK16X7R1C106K</b>

### Fine Print
