

C Programming

[INDEX](#)[◀ Previous](#)[Next ▶](#)

THE RELATIONAL OPERATORS

These allow the comparison of two or more variables.

Operator	Meaning
==	<i>equal to</i>
!=	<i>not equal</i>
<	<i>less than</i>
<=	<i>less than or equal to</i>
>	<i>greater than</i>
>=	<i>greater than or equal to</i>

In the next few screens, these will be used in *for* loops and *if* statements.

The operator

<>

may be legal in Pascal, **but is illegal in C.**
