Home Electronic Component Chips Sensor Arduino Module Raspberry Pi

BMP280 Pressure Sensor Module Replace BMP180 Arduino High PrecisionAtmospheric

- Bosch has stepped up their game with their new BMP280 sensor, an environmental sensor with temperature, barometric pressure that is the next generation upgrade to the BMP085/BMP180/BMP280. This sensor is great for all sorts of weather sensing and can even be used in both I2C and SPI!
- This precision sensor from Bosch is the best low-cost, precision sensing solution for measuring barometric pressure with ± 1 hPa absolute accuracy, and temperature with $\pm 1.0^{\circ}\text{C}$ accuracy. Because pressure changes with altitude, and the pressure measurements are so good, you can also use it as an altimeter with ± 1 meter accuracy

Typical application:

- Enhancement of GPS navigation
- e.g.time-to-first-fix improvement, dead-reckoning, slope detection
- Indoor navigation (floor detection, elevator detection)
- Outdoor navigation, leisure and sports applications
- Weather forecast
- Health care application (e.g. sirometry)
- Vertical velocity indication (e.g. risk/sink speed)
- Target devices
- Handsets such as mobile phones ,table PCs,GPS devices
- Navigation systems
- Portable health caredevices
- Home weather stations
- Flying toys
- Watches
- PCB size:(L*W)1.52* 1.20cm/0.60"*0.47"

Pcakge Included

1 x BMP280 Pressure Sensor Module Arduino High Precision Atmospheric Replace BMP180

Payment

Shipping

Refund

- We accept PayPal only. But we only **Accept** your **Ebay Address**,Please Make sure it's 100% right.
- Payment must be received in 5 business days of auction closing.
- Please leave note for your special request (e.g. Colors or Size) in PayPal when you pay the order.
- Any special request cannot be accepted after 24 hours of payment, because most of orders will be processed instantly and same day dispatched.
