ESP8266 Serial WIFI Wireless Transceiver Module Send Receive LWIP AP

**Description**

ESP8266 has powerful on-board processing and storage capabilities that allow it to be integrated with the sensors and other application specific devices through its GPIOs with minimal development up-front and minimal loading during runtime. Its high degree of on-chip integration allows for minimal external circuitry, and the entire solution, including front-end module, is designed to occupy minimal PCB area.

Features

1. SDIO 2.0, SPI, UART
2. 32-pin QFN package
3. Integrated RF switch, balun, 24dBm PA, DCXO, and PMU
4. Integrated RISC processor, on-chip memory and external memory interfaces
5. Integrated MAC/baseband processors
6. Quality of Service management
7. I2S interface for high fidelity audio applications
8. On-chip low-dropout linear regulators for all internal supplies
9. Proprietary spurious-free clock generation architecture
10. Integrated WEP, TKIP, AES, and WAPI engines

Solutions

1. Supports APSD for optimal VoIP applications
2. Patented spurious noise cancellation algorithm for integration in SOC applications
3. Supports Bluetooth co-existence interface
4. Self-calibrated RF to ensure optimal performance under all operating conditions
5. Zero factory tuning
6. No external RF components

Specifications

1. 802.11 b/g/n
2. Wi-Fi Direct (P2P), soft-AP
3. Integrated TCP/IP protocol stack
4. Integrated TR switch, balun, LNA, power amplifier and matching network
5. Integrated PLLs, regulators, DCXO and power management units

6. +19.5dBm output power in 802.11b mode
7. Power down leakage current of <10uA
8. Integrated low power 32-bit CPU could be used as application processor
9. SDIO 1.1/2.0, SPI, UART
10. STBC, 1×1 MIMO, 2×1 MIMO
11. A-MPDU & A-MSDU aggregation & 0.4ms guard interval
12. Wake up and transmit packets in < 2ms
13. Standby power consumption of < 1.0mW (DTIM3)

Help your development more easy.

ESP8266 Serial WIFI Module Communit Forum

1. WIFI Wireless Transceiver Module
2. Module size: 24.8 x 14.3mm
3. LWIP agreement
4. Support 3 modes: AP, STA, AP+STA
5. High efficiency AT commands, simple for your development

[>>Translate data sheet](#)

[>>Some translated document](#)

[>>Turial](#)

Now your Arduino can get on WiFi without braking the bank.

Use this module for your next Interet of Things project, home automation, Or remote sensor project.

This module adats the ESP8226 IC for use over a serial connection using simple AT commands.

No SPI interface or Know-How is required.

Payment

a) We Only accept Paypal payment.

b) Please accomplish payment within **7** days after purchase. If you do have any reason cannot make payment timely, kindly please email me. Otherwise, all unpaid items will be filed an unpaid item dispute through eBay.

Shipping

a) We ship package via regular **China Post Air Mail**, if you want to choose faster shipping way like EMS, DHL ..Please cont: ASAP.

b) Items will be sent within **48** hours after payment cleared.All items are inspected for damage or defects before leaving our warehouse.

c) Usually, the item will be arrived in **10-40** days based on the shipping method. Any way, we will offer you a related tracking number.

d) Please do remember to check your **shipping address** match your**PayPal address**,we will only ship to confirmed address f Paypal.If you want to change the shipping address, please make a note on PayPal note when you pay.

e) Final purchase price do not cover any applicable tax or duty that might be charged by customs .Buyers are responsible for such charges

Return

Your SATISFACTION is our ultimate goal.We work hard to earn your trust and future business.

a) If you have a defective item, you can return it or ask for a discount. Please contact us within **7** days upon receipt of item.

b) (Please ensure that returned items are the ones that you purchased from us. We are not responsible for any item sent to that is not our product.)What you returned must be unused and in the original packaging as received. Customer is responsible for shipping charges on returned items.Please add a piece of paper written your eBay ID accompanied with the returned item that we could process the replacement/refund accordingly.The return must be accompanied by a **Return Merchandise Authorization (RMA)** number, which is to be issued upon request. Please be advised that we cannot process exchanges without an RMA #.

c) Items returned will be tested, if found defective, we will refund the money to you when we get the return items, or replace it for you. Items returned and not found defective will be returned at buyer's expense.

Feedback

a) **Positive feedback** will be left after received positive feedback from buyers. We believe we can produce a positive outcome any situation and will work hard to earn your praise. We strongly recommend all our customers to post a positive feedback.

b) Before leaving any negative or neutral feedback, please let us have a chance to assist you in any problems that you may encounter. Negative and neutral feedback will kill us.

c) Due to eBay's new Star rating system and its lack of explanation and clarity, I would like to try to give you an insight as to how it affects our business. You may think that a 4 star rating would be good as eBay says. Actually, it doesn't like that. Anything less than a **5 star** rating on all categories might as well be a negative feedback score. If you are not completely satisfied with any transaction and believe it to be never your fault. Please contact us and we will take care of the problem.

d) Please contact us through **Ebay message** system. Good communication is the best way to solve any issues. Please try!! If you have any problems or concerns whatever with your order or products, please message us and give us a chance to assist you before you leave any feedback.

Contact us

Welcome, please feel free to contact us.

Our working time:

Monday To Saturday: **9:00 to 21:00**(Beijing China time)

Sunday To Friday: **18:00 to 6:00** (PT: Pacific Time)

a) We are in different time zones, during our working time, we will reply your email within 24 hours. If it's not working time, please be patient and considerable to give us a little more time.

b) Please contact us with ebay messages. E-mail is often filtered as spam.

c) Please wait for our reply to your email, we will do our best to help you solve the problem.
