LM393 light Sensor Module 3.3-5V input light Sensor for Arduino Raspberry pi

Product Description

**Usage:**  
Light level detection, the brightness of the light sensor is directional, only inductive sensor in front of the light source used to find light better

**Module Features:**

1. The brightness of surrounding environment and the light intensity can be detected (compare with the photoresistor, directivity is relatively good, can perceive the fixed direction of the light source)
2. Sensitivity adjustable the blue digital potentiometer adjustment (Figure)
3. Operating voltage 3.3V-5V
4. Digital switching outputs (0 and 1)
5. With fixed bolt hole for easy installation
6. Small board PCB size: 3.2cm \* 1.4cm

**Instructions for use**

1. Photodiode module is most sensitive to the ambient light, generally used to detect the brightness of the ambient light intensity, photoresistor sensor module Universal In most cases, the difference between the two is that photodiode module directional, can sense the fixed the direction of the light source.
2. Module in the light conditions or the light intensity of less than a set threshold, DO port outputs a high level, when the external environment when t light intensity exceeds the set threshold value, the module DO output is low;
3. The small board digital output DO can be connected directly with the microcontroller microcontroller to detect high and low to detect environmental light intensity change;
4. Small board digital output DO OUR relay module can directly drive, which can be composed of a photoelectric switch;

**Payment**

| Payment       | Payable To                                                                        | Note                                                                                                                       |
|---------------|-----------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------|
| <b>PayPal</b> |  | All payments are due within 7 days of the close of auction. Failure to do so, non-paying bidders will be reported to eBay. |

**Shipping Policy**

|                  |                                                                                                                       |
|------------------|-----------------------------------------------------------------------------------------------------------------------|
| Delivery Time    | We ship to worldwide, it usually takes 10-30 Business Days to delivery.                                               |
| Shipping address | We ship to your PayPal address. Please, make sure to provide us with correct, precise, and detailed shipping Address. |
| Send Time        | Items will be shipped within 1 to 3 business days upon payment received or cleared.                                   |
| Note             | If you don't receive items over 30 business days, please notify us via eBay message.                                  |

**Return Policy**

We appreciate your business and offer an instant 7 days return policy.(7 days after receive the item). The returned item has to be in its original condition. We are able to refund your money without shipping cost.

**Contact us**

For anything about product, price, shipping or order status, please contact us via eBay message.  
We love positive feedback and 5 scores DSR. We will leave it for everyone that leaves it for us.
