Home Modules Sensor Arduino Raspberry Pi 3D Printer Chips

New DHT11 Temperature and Relative Humidity Sensor Module for arduino

100% brand new and high quality

DHT11 sensor adopts
The module can detect surrounding environment of the humidity and temperature
High reliability and excellent long-term stability
output form digital output
has fixed bolt hole and easy installation
Cables are free for you

Specification:

Humidity measurement range: 20%~90%RH
Humidity measurement error: ±5%RH
Temperature measurement range: 0~60℃
Temperature measurement error: ±2℃
Working voltage :5 V
Size: 28x12x8mm

Package Included:

Package included:

1PCS* For Arduino DHT11 Temperature and Relative Humidity Sensor Module

Payment Shipping Refund

- We accept PayPal only. But we only **Accept** your **Ebay Address**,Please Make sure it's 100% right.
- Payment must be received in 5 business days of auction closing.
- Please leave note for your special request (e.g. Colors or Size) in PayPal when you pay the order.
- Any special request cannot be accepted after 24 hours of payment, because most of orders will be processed and same day dispatched.

Useful sensor

It needs some software calibration, but it works really well and it's a great value for money.

Apr 20, 2016

Fantastically compact and functional.

I actually had purchased this for repairing a dehumidifier. I reworked it and installed it and presto! one working (again) dehumidifier.

May indeed buy another just to play with with my arduino.

DHTT11 Temp/Rel Hum. Sensor for Arduino

. Received quicker than expected; worked flawlessly. This even proved my temp gun was out of spec. Thank You.
